Proxy Configuration Guide for npm, apt, and Git

1. npm Proxy Setup & Reset

Set npm proxy

```bash

```
npm config set proxy http://127.0.0.1:10808
npm config set https-proxy http://127.0.0.1:10808
Remove npm proxy (reset to default)
```bash
npm config delete proxy
npm config delete https-proxy
Check current npm proxy settings
```bash
npm config get proxy
npm config get https-proxy
2. apt Proxy Setup & Usage
Run 'apt update' with proxy temporarily
```bash
sudo apt update -o Acquire::http::Proxy="http://127.0.0.1:3128"
*(Replace `127.0.0.1:3128` with your proxy address and port)*
Set apt proxy permanently
Create or edit '/etc/apt/apt.conf.d/95proxies' with:
```

```
Acquire::http::Proxy "http://127.0.0.1:3128/";
Acquire::https::Proxy "http://127.0.0.1:3128/";
Remove apt proxy configuration
```bash
sudo rm /etc/apt/apt.conf.d/95proxies
3. Git Proxy Setup & Reset
Set Git proxy
```bash
git config --global http.proxy http://127.0.0.1:10808
git config --global https.proxy http://127.0.0.1:10808
Remove Git proxy (reset to default)
```bash
git config --global --unset http.proxy
git config --global --unset https.proxy
Check current Git proxy settings
```bash
git config --global --get http.proxy
```

git config --global --get https.proxy
